

Comata 2.4 GHz SMD Antenna

Part No. 3030A6111

Product Specification

1 Features

- Designed for 2.4 GHz applications: Bluetooth®, Wi-Fi® (802.11b/g), ZigBee®, etc.
- Easy to integrate
- Designed for use with the ground plane extended beneath the antenna
- High efficiency
- Light weight
- Intended for SMD mounting
- Supplied in tape on reel

2 Description

Comata is intended for use with all 2.4 GHz applications. The antenna uses a ground plane in order to radiate efficiently and the ground plane must extend underneath the antenna itself.

3 Applications

- Mobile phones
- PDAs
- PNDs
- Headsets
- PMPs / MP3s
- Laptops
- PC-Cards
- Sensors
- Automotive

4 Part number

Comata: 3030A6111-01

5 General data

Product name	Comata 2.4 GHz
Part Number	3030A6111-01
Frequency	2.4 – 2.5 GHz
Polarization	Linear
Operating temperature	-40 °C to +85 °C
Impedance with matching	50 Ω
Weight	0.3 g
Antenna type	SMD
Dimensions	12.8 x 3.6 x 3.3 [mm]

6 Electrical characteristics

	Typical performance	Conditions
Peak gain	0 dBi	All data measured on Antenna's reference board, part number AN-1-0504-3 Data given for the 2.4 – 2.5 GHz frequency range
Average gain	-3.5 dBi	
Average efficiency	45%	
Maximum Return Loss	-8 dB	
Maximum VSWR	2.3:1	

7 Electrical performance

7-1 Return Loss

7-2 VSWR

7-3 Antenna patterns

Patterns show combined polarisations measured on reference board AN-1-0504-3

8 Antenna dimensions

9 Antenna footprint

Comata (Part No: 3030A6111-01)

- CAD files of the antenna footprint are available from Antenova on request. Please contact info@antenova.com for further details.

I	S	K	J	M	O
3.0 ± 0.1	1.2 ± 0.1	6.9 ± 0.1	1.0 ± 0.1	≥ 0.4 ± 0.1	0.2 ± 0.1

Dimensions in mm

10 Electrical interface

10-1 Transmission lines

- All transmission lines should be designed to have a characteristic impedance of 50 Ω
- The length of the transmission lines should be kept to a minimum
- Any other parts of the RF system like transceivers, power amplifiers, etc, should also be designed to have an impedance of 50 Ω

Once the material for the PCB has been chosen (PCB thickness and dielectric constant), a coplanar transmission line can easily be designed using any of the commercial software packages for transmission line design. For the chosen PCB thickness, copper thickness and substrate dielectric constant, the program will calculate the appropriate transmission line width and gaps on either side of the track so the characteristic impedance of the coplanar transmission line is 50 Ω .

10-2 Matching circuit

The antenna requires a matching circuit that must be optimized for each customer's product. The matching circuit will require up to three components and the following pad layout should be designed into the device so the correct circuit can be installed:

Antenna feed pad indicated. All other pads should be connected to ground.

In addition to the matching circuit, a separate DC blocking capacitor will also be required between the radio and the antenna matching circuit.

Note: The component values for the matching circuit will vary depending on the size of the PCB and surrounding components. The impedance of the antenna should be measured before selecting suitable matching components. Antenova offers this service on request. Contact info@antenova.com for further information.

10-3 Antenna placement

Antenova strongly recommends placing the antenna near the edge of the board. Maximum antenna performance is achieved by placing the antenna towards one of the corners of the PCB, with the feed point of the antenna as close to the corner of the PCB as possible.

10-4 Reference board

The reference board has been designed for evaluation purposes of Comata 2.4 GHz and it includes a SMA female connector.

Dimensions in mm

To order a reference board contact info@antenova.com

11 Soldering

This antenna is suitable for lead free soldering.

The reflow profile should be adjusted to suit the device, oven and solder paste, while observing the following conditions:

- The maximum temperature should not exceed 240 °C
- The antenna should not be exposed to temperatures exceeding 120 °C more than 3 times during the soldering process.

12 Hazardous material regulation conformance

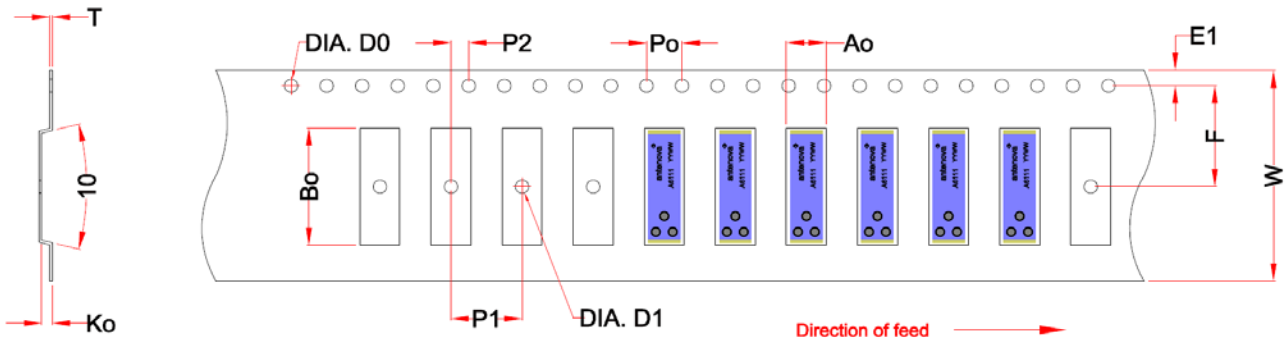

The antenna has been tested to conform to RoHS requirements. A certificate of conformance is available from Antenova's website.

13 Packaging

13-1 Optimal storage conditions

Temperature	-10°C to 40°C
Humidity	Less than 75% RH
Shelf Life	12 Months
Storage place	Away from corrosive gas and direct sunlight
Packaging	Reels should be stored in plastic packaging

13-2 Tape characteristics

W	F	E1	P0	P1	P2	A0	B0	K0	T	D0	D1
24 ± 0.2	10.2 ± 0.1	1.75 ± 0.1	4 ± 0.1	8 ± 0.1	2 ± 0.1	3.9 ± 0.1	13.2 ± 0.1	3.7 ± 0.1	0.3 ± 0.05	Min 1.5	Min 1.5

Dimensions in mm

Quantity	Leading Space	Trailing Space
2000 pcs / reel	50 blank antenna holders	37 blank antenna holders

13-3 Reel dimensions

Width (W)	Reel Diameter (D)	Hub Diameter (H)	Shaft Diameter (C)
32 mm	330 ± 2 mm (13")	100 mm	13 ± 0.5 mm

13-4 Box dimensions

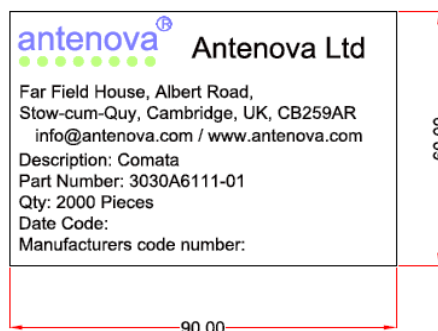

Width (W)	Breadth (B)	Thickness (H)
345 mm	345 mm	45 mm

13-5 Bag properties

Reels are supplied in protective plastic packaging

13-6 Reel label information

Dimensions in mm
